

Winooski Storm Drain Mural Application

All applications must be received before midnight on September 24, 2018.

Name (s): _____

If applying as a group, please list all artist names and provide contact information just for the team lead below

Address: _____

Phone Number: _____

E-mail: _____

Artist's Statement - Please describe why you are interested in being part of this project and explain how your design will help educate community members about storm water quality.

Community Involvement - If chosen, how will you involve other community members in your project? Would you be willing to have passers-by help paint the mural? Will you share about the project on social media or other outlets? Get creative!

The following are requirements for participating. Please check the box to acknowledge::

- I am available to paint the mural on Weds, Oct 10th at 9:00am with a Rain Date of Thurs, Oct 11th
- I will provide my own supplies, including brushes and approved types of paint
- Whether I apply as an individual or with a group, I understand that stipend per mural is \$250

Send this application and images of your design by mail or email to:

Rethink Runoff's Stream Team is a project to engage citizens across a nine-town area (Burlington, Essex, Essex Junction, Milton, Shelburne, South Burlington, Williston, Winooski, and Colchester) to implement projects to reduce nonpoint source pollution and stormwater volume at the local level. The program is managed by the Chittenden County Municipal Separate Storm Sewer designated towns and run by the Winooski Natural Resources Conservation District.

Thanks to the City of Winooski Department of Public Works for their collaboration in this effort.

Winooski Storm Drain Mural Application

All applications must be received before midnight on September 24, 2018.

The selection committee will utilize the following points system to choose the final three designs:

1. Mural concept clearly conveys and communicates the importance of keeping waterways clean and/or not dumping materials down drains - 5 pts
2. Mural concept contains a catchy, environmental message - 5 pts
3. Mural can easily be painted on the sidewalk adjacent to the drain - 5 pts
4. Artist has a strategy for involving the community in their mural - 5 pts
